

The EXPO Innovation Challenge is about creating solutions to real challenges through purpose-driven tech. We want to bring together the most innovative, daring and talented programmers, entrepreneurs and designers, and provide them with a supporting environment to build high-impact and scalable solutions under the theme “Feeding the Planet. Energy for Life” in less than 72 hours. The winning teams will be awarded up to 20,000 EUR and have the opportunity to go through an unique process of incubation and mentorship, provided by leading European incubation hubs for 6 months, in order to give them an opportunity to develop their ideas into successful startups. During this period, the startups will be supported by mentors, tutors and various industry experts.
